Inclusion (picture)

INNER JOIN

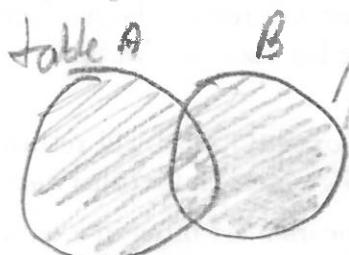

LEFT OUTER

RIGHT OUTER

FULL OUTER

Join Type (picture)

NATURAL → automatically joins using all field names in common to both A & B

USING (fieldname) → combines using the specified field name (which must be in common)

ON (tableA.fieldx = tableB.fieldy) → combines according to the provided expression. You must use this one if the field used for joining has a different name in the two tables.
